

Dear Sir/Madam

My name is Anatoliy Shevchenko and I am Project manager of international development of Brovapharma, German-Ukrainian Research & Production Firm, Ltd. – manufacturer of veterinary preparations (www.brovafarma.com.ua)

For more than 23 years, the company Brovapharma is a number one manufacturer of veterinary preparations in Ukrainian market. Its products are well-known to not only Ukrainian veterinarians and animal breeders, more than the third part of products is exported to 12 world countries: Azerbaijan, Armenia, Georgia, Moldova, Belarus, Russian Federation, Kazakhstan, Kirgizstan, Tadzhikistan, Uzbekistan, Turkmenistan, and UAE.

Brovapharma is working closely with scientists from leading research and educational institutions of Ukraine and other countries. In recent years, the company received 34 patents, published 36 textbooks and practical manuals, as well as about 100 guidelines for veterinary medicine. We produce more than 120 kinds of medicines for animals, including antiparasitic, antimicrobial, disinfectants, preparations for the reproductive organs and care of the mammary gland, for anesthesia and relaxation, vitamin-mineral complexes, etc. New production area of 3000 sq. m. allows manufacturing products in compliance with GMP.

We have an intention to expand our export to other world countries and we are looking for companies from Jordan that can be potential partners for registration and distribution of our veterinary products. You can find a brief information about our company in attachment.

We would very much appreciate your help in search for potential partners in Jordan! I am positive that such cooperation will be fruitful and beneficial both for the partner company and for the farming industry of your country!

With kindest regards,

Anatoliy Shevchenko
