

Dear Sir/Madam,

Ukrainian State Enterprise UKRSPIRT is an exclusive state producer and operator of the Ukrainian ethyl alcohol on internal and foreign markets. We are interested in expanding our business and exporting our products to your market.

Our portfolio includes following types of rectified ethyl alcohol:

- **Rectified ethyl alcohol «Pshenichna sleza».** This type of ethyl alcohol is produced from the high quality wheat and is used for production of high-end alcohol.
- **Rectified ethyl alcohol «Lux».** This type of ethyl alcohol is produced from the high quality wheat and is used for production of premium and luxury alcohol.
- **Rectified ethyl alcohol «Extra».** This type of ethyl alcohol is used for production of classic alcohol drinks
- **Rectified ethyl alcohol «Highest purification».** This type of ethyl alcohol is produced from grain or beats and is widely used in food industry, medical industry and also in alcohol production industry.
- **Ethyl alcohol for industrial use.** This type of ethyl alcohol is used in chemical production (biofuel, detergents, screen wash etc)
- We can produce ethyl alcohol according to the specifications required by the buyer

Additional information (specification on each type of alcohol) is available upon request.

All our products are certified and correspond to international standards. SE Ukrspirt is certified according to ISO 14001, ISO 22000, HACCP (Hazard Analysis and Critical Control Points), ISO 18001, ISO 9001.

In order to prepare individual offer we would like to have the following information:

- 1) Type of ethyl alcohol you might be interested in
- 2) Approximate quantities (monthly, yearly)
- 3) Logistics information

Should you require any further information, please feel free to contact me at any time.

Best regards,

Kateryna Nikitina
